## *Climbing Wall Meets Swimming Pool*

AQUACLIMB IS A CLIMBING WALL THAT ATTACHES TO the edge of the swimming pool. They offer models for commercial pools as well as indoor and outdoor residential pools of various shapes and sizes. Built-in safety features keep the walls kid friendly. The AquaClimb panels feature high quality fiberglass with a textured non-slip surface. The system is

designed to hold up to UV rays, high winds, and salt and chlorinated water. The climbing wall incorporates real rock features with inset and protruding holds. The panels can be interchanged and rotated to offer variety and different levels of difficulty.

ALL I CAN SAY IS WHERE WERE THESE ALL THOSE YEARS I WAS ON SWIM TEAM GROWING UP?

They look like a great way to incorporate both fun and fitness into the swimming pool environment.
